Home Complexion Peeler Works Wonders

To keep the face, neck, arms and hands truly beautiful and youthful in appearance, the treatment which seems most sensible is one which will actually remove the skin itself immediately it begins to age, fade, coarsen or discolor. The only known treatment which will do this, aside from a painful, expensive surgical operation, is the application of ordinary mercolized wax, which is as harmless as it is effective.

The wax is put on at night, just as you apply cold cream, and washed off in the morning. It absorbs the dead and half-dead surface skin in almost invisible flaky particles, a little each day, no discomfort being experienced. With the disappearance of the old cuticle, the newer, healthier skin underneath gradually appears, richly beautiful with the flush of youth. This mercolized wax, which you can get at any drug store in original package, is indeed a verificile. flush of youth.
